- Removing People Zoombombers
  - What is the criteria for removing Zoombombers? We want to make sure that we do not remove addicts who are looking for recovery including:
    - People with strange names
    - Young People
    - People with strange (and no-offensive pictures)
    - People who use the chat in unusual ways (not offensive)
  - Also remember that we are all human so we are all just doing the best that we can.
  - Best practice to make sure we do not accidentally remove an addict seeking recovery.
  - Maybe adjust some wording in the format to let people know if someone is disruptive that you turn off their camera first and message them before removing them. Let them reveal themselves as inappropriate first. Also maybe add something about what to do if you are accidentally removed that its not personal. (Tabled for next month – old business).
